THE GEM

WORLD'S FINEST VARIETIES IN OUR CATALOG  
PLANTS, SEEDS AND EVERGREENS

# NEW GEM

This veritable giant is creating a sensation throughout the berry growing section. We have carefully watched the Gem for two years and found them to be the first Strawberries ripe and the last. As I am writing this page, November 12th, the Gem is still bearing fruit. The Gem Everbearing will give you luscious fresh Strawberries for your table all summer long from plants set same year. In our test we found this variety to hold its extra large size throughout the season. The berries have a good flavor and are very firm and hardy. Ripens evenly. Berries are sparkling bright red clear through. Gem is well named. It could be called faultless. So far we have found no fault. Gem will bring you big crops and large profits all summer and fall. No more lean years when you plant the Gems, as they rebud again if killed by frost.

You will never appreciate the fruit of the New Gem until you see these large sparkling jewels clinging on your own vines. Try out this new outstanding commercial variety this season. A new sensation of the Strawberry world. Before you turn this page consider the certified Gem Everbearing at our reasonable prices. Gem tied with Black String. Postage see page 22.

IN MY 18 YEARS OF EXPERIENCE in growing Strawberries it has proven a source of pleasure and profit. Started in 1915 and have grown many varieties. This is especially true when I review before me copies of seventeen annual catalogs that we have sent out to our customers. Each annual catalog is sacred to me as they hold within the joys and the success we have had with the Everbearing Strawberries. Think of it, we hold the United States record, \$2,059.20 for one acre, set same year. Over \$1,100.00 worth of Everbearing were picked and sold in three weeks. Our Roadside Fruit stand is on a 40-Foot Super Chicago and Detroit highway. One of our customers reports he picked 800 quarts from 1,000 plants. No other crops will produce this amount from spring planting. Always keep in mind that Everbearing Strawberries require the smallest amount of ground with the largest income on record. With the proper care any soil will yield up its riches.

**Set Just Right**

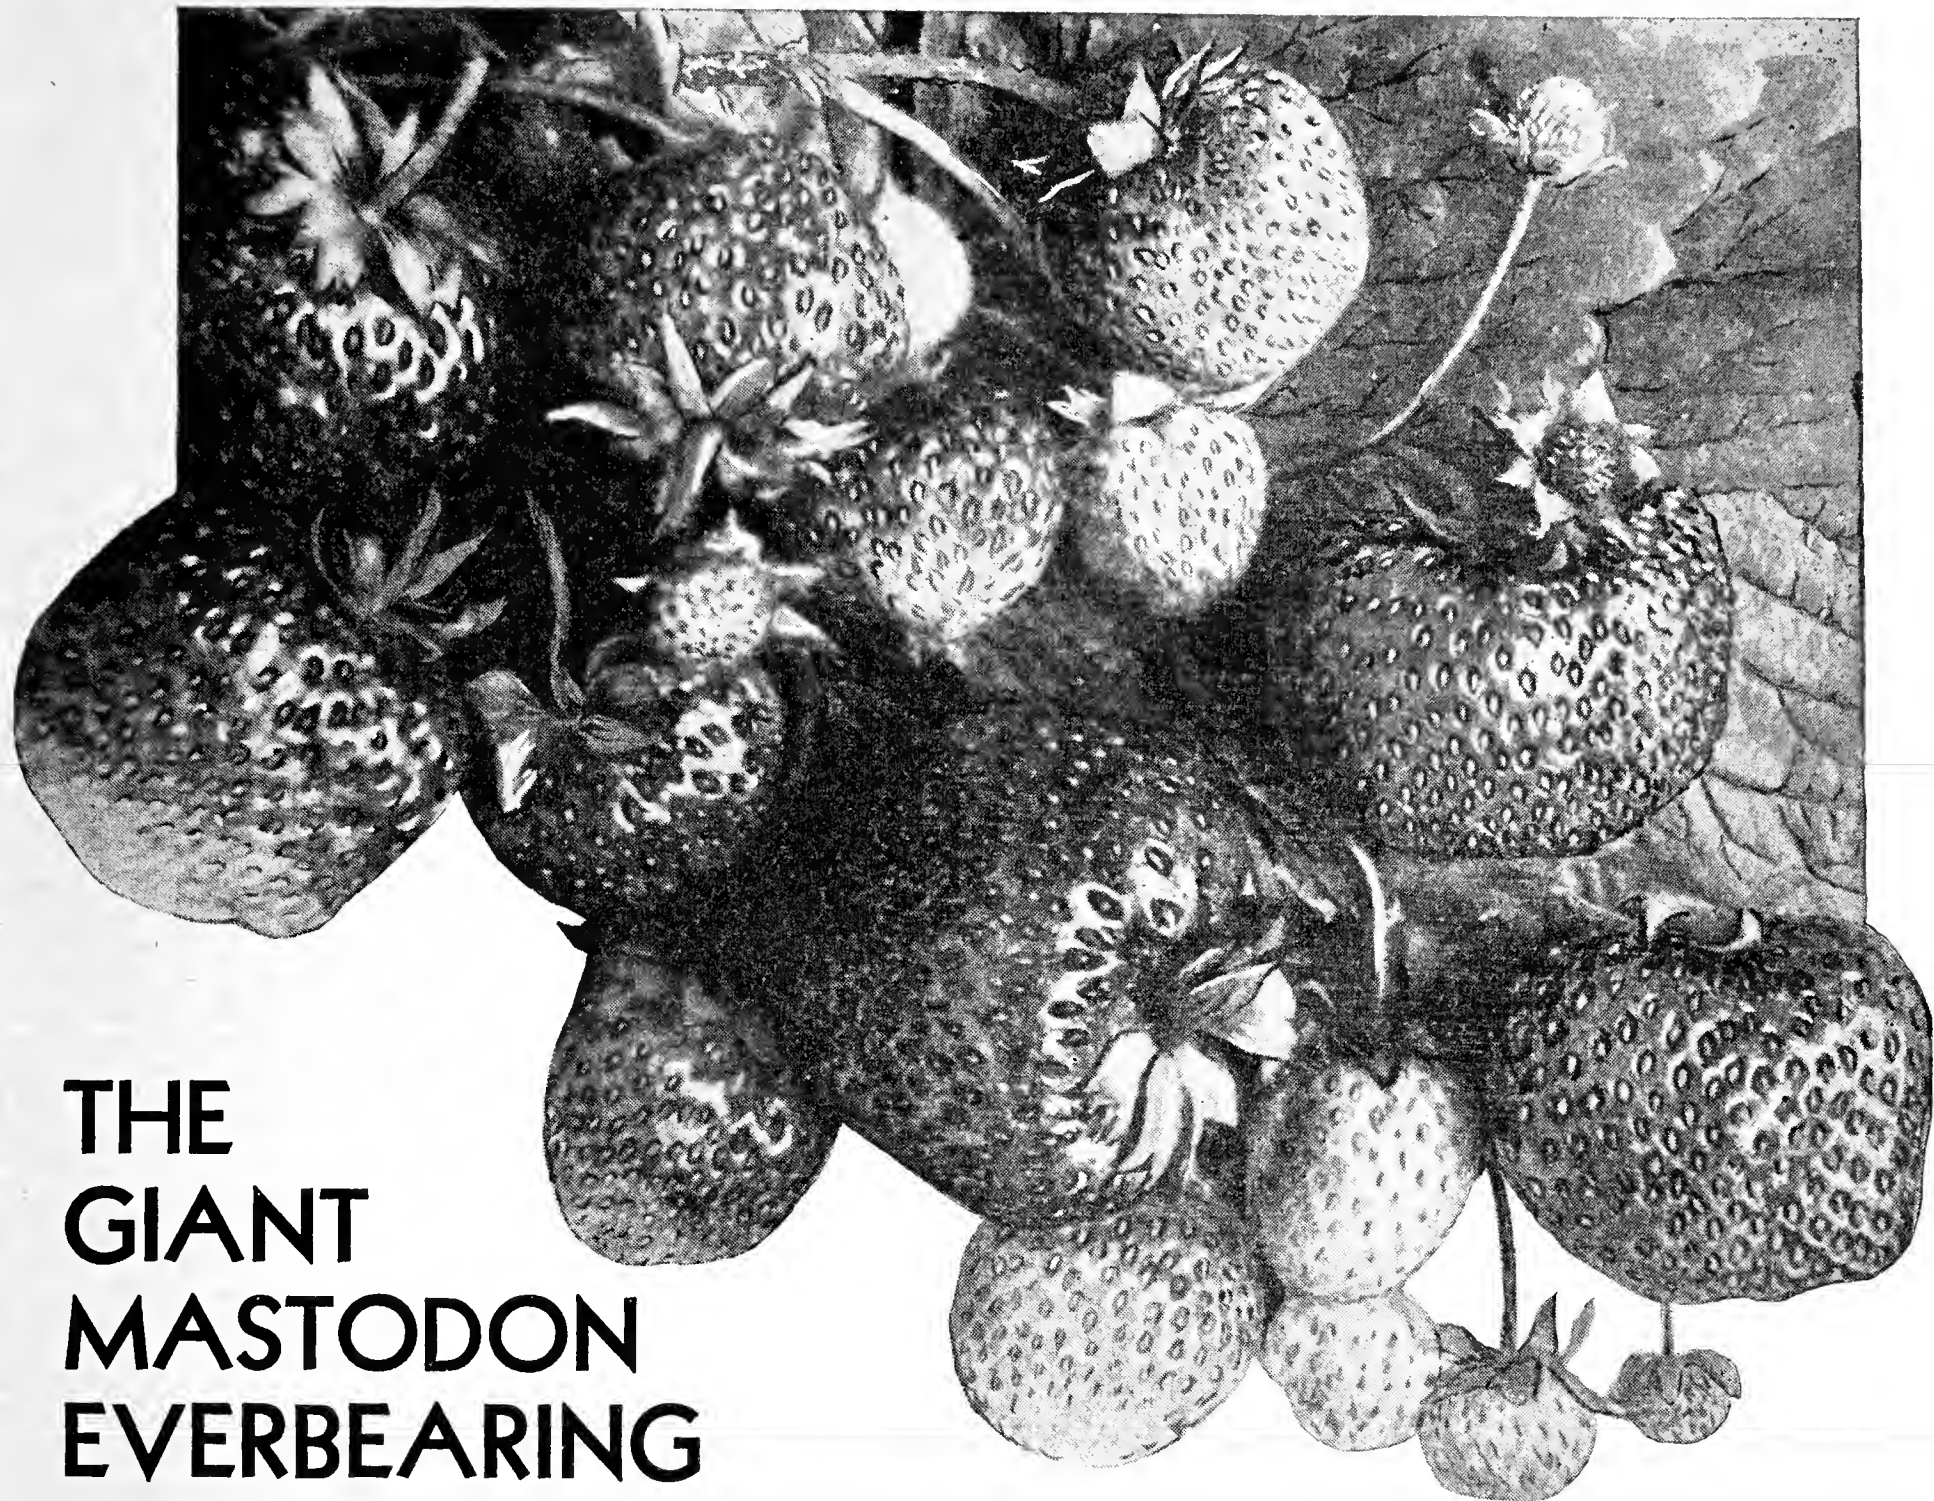

## NEW BUSH EVERBEARING

This peculiar Everbearing grows on large bushes 10 inches high, 15 inches across. We counted 15 fruit stems loaded with fruit from one plant. Entirely unlike any other Everbearing. Multiplies its new plants from crowns. Owing to this it is very productive. Berries large as Mastodon. Some specimens larger, but honey sweet. Finest quality. Ripen up even with attractive dark red color. Bears 60 days after set out. The United States Department of Agriculture has pronounced it the best Everbearing Strawberry so far produced. A real Giant Berry. The Bonanza, Wayzata, Rockhill and our BUSH Everbearing we believe are identical all the same variety. Plants are very limited this year so order early. See page 22, free seeds and plants.

# THE GIANT MASTODON EVERBEARING

We have grown the Mastodon Everbearing for 10 years. This World's WONDER BERRY has stood the test of time. It well deserves its name, The MASTODON. Bears fruit that actually approaches the size of small apples. It will produce a wonderful crop, 10 months out of 18. Berries will hold their mammoth size throughout the whole season. Just as large in November as in July. The huge size of the berries and the mammoth yield of each plant is truly marvelous. Mastodon is the most sturdy and vigorous plant maker. It is an upright growing plant with enormous fruit stems. It has an unsurpassed root system, which enables them to bring its loads of large fruit to maturity in dry season as under adverse conditions.

Some of our berries measured  $1\frac{3}{4}$  inches wide, 2 inches long and  $5\frac{1}{2}$  inches around the berry and weighed one ounce. Real strawberries. Nine berries have topped a quart box. The largest berries on record and the nearest perfect in every way, size, color, sweetness, flavor and hardness. Mastodon has a record of 5,520 quarts per acre. Sure an ideal berry. Easy to sell from its appearance alone. A fancy berry in the truest sense of the word, which greatly adds to its market for top prices.

We can safely say that we grow and sell more Mastodon Everbearing Strawberries around New Buffalo, Mich., and on the highway

to roadside trade than any other place in the United States. Over 2,500 quarts of Everbearing were picked the week of October 25th. We sold at our roadside stand 280 quarts in five hours. Out of the eight Everbearing's that we list in our catalog every one is good and their true value cannot be appreciated until you see them fruiting after July 1st, the same year plants are set. Why plant corn, wheat or try and raise hogs at a loss when you can have a full crop of Everbearing Strawberries in 60 days after your plants are set in the spring all in the same year. MASTODON is the best Big Quick Money Crop to plant.

Our customers have made from \$60.00 to \$125.00 per 1,000 plants set. One of our customers last year bought 135,000 Mastodon Everbearing plants. Just one party. WHY? Because Berry growers are planting heavy that have a good market for out of season strawberries. It means big returns from a small investment of plants on the least amount of ground. Our records show that a 7-year average we made \$90.81 per 1,000 plants set. The quart run was from 186 to 364 quarts of Strawberries picked per 1,000 plants set. Order your plants early this year. Owing to the very dry season over the whole country plants will be in big demand. The plant crop is very short. Our supply of plants is the best we have had in years due to irrigation and lot of late fall rains at plant making time. Grown on good sandy loam, which means lots of extra fine deep rooted plants. Our plants are all certified TRUE TO NAME and first class plants at reasonable prices. Mastodon plants will be tied with red string. Do not wait, but order EARLY.

## CHAMPION EVERBEARING

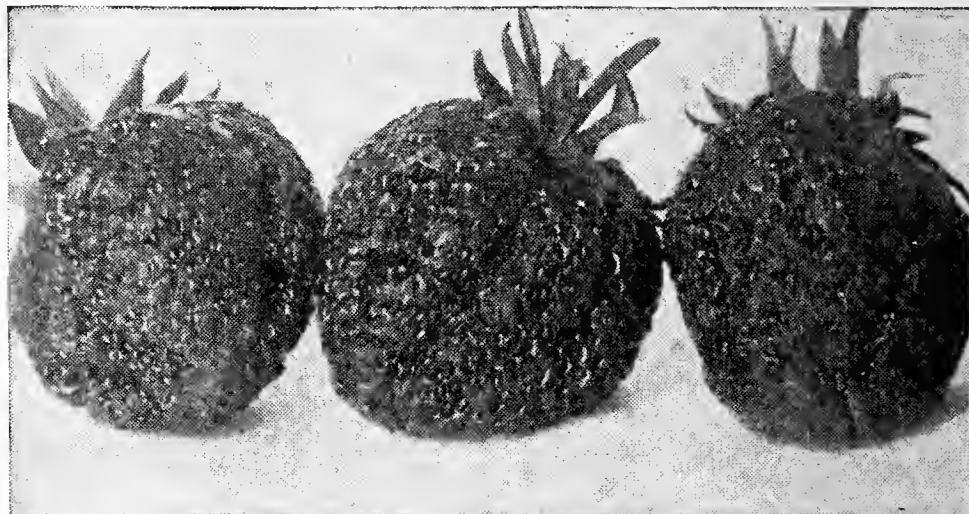

The Champion Strawberries are very large, deep dark red and as sweet as honey. Aromatic flavor. The richest flavored canning Strawberry of them all. Berries round, firm and good shippers. We originated the Champion Everbearing in 1914 and hold the United States Record. From one acre set to Champion we produced 5,623 quarts of berries that sold for \$2,059.20. This is the best known record in United States. One week in August we picked 689 quarts of Champion. Sold for \$293.05. This record was made in only 129 days and all in the same year the plants

were set. Think of the Strawberries that you can sell right in your own home town this summer and fall. From July until snowfall, if you plant Champion this spring. Order your supply right now and get started this year. Champion tied with green string.

**25 for 40c; 50, 70c; 100, \$1.25; 300, \$2.95; 500, \$3.95; 1,000, \$7.90**

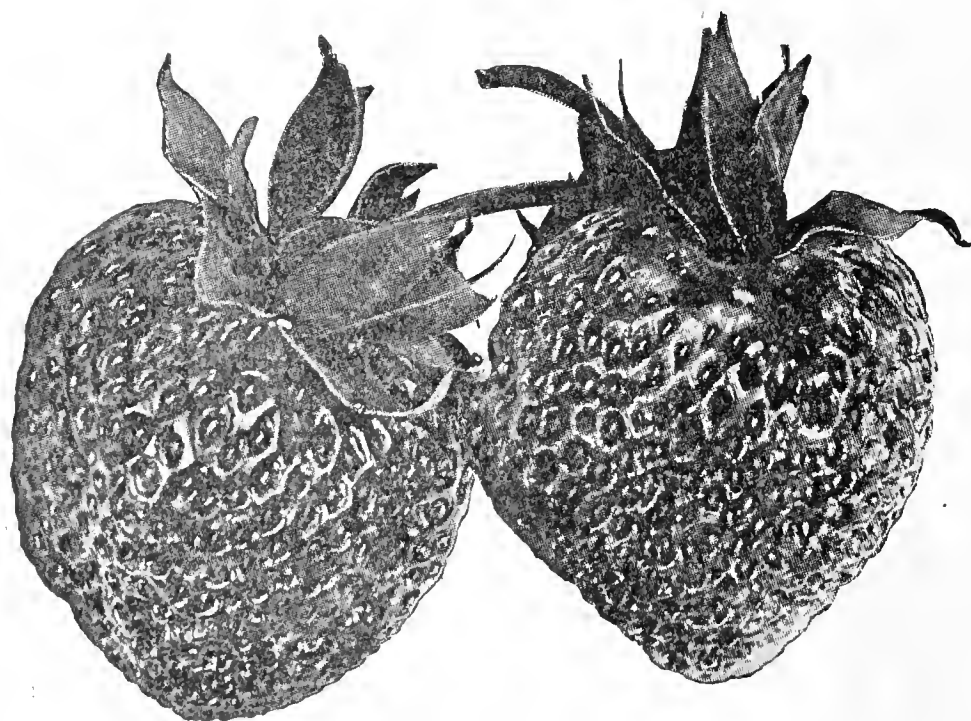

## LUCKY STRIKE EVERBEARING

Lucky Strike is very productive. Fruit very large and is of a beautiful bright red color. Sweet and very firm. There is something indescribable about Lucky Strike. Its rich sweet flavor commands admiration from our roadside customers. Some of our plant customers say that Lucky Strike produces the most magnificent berries they have ever seen. The plants grow big and sturdy. Heavy long roots withstanding in the drought area. You can enjoy real rich juicy Strawberries that are simply delicious right from your own garden all summer and fall. You can also look for a big fruit crop early next spring if you plant Lucky Strike Everbearing. All our plants have fine roots this year and are all hand cleaned and are easy to set out.

**25 for 45c; 50, 80c; 100, \$1.50; 300, \$3.50**

## CLEARMONT (Extra Early)

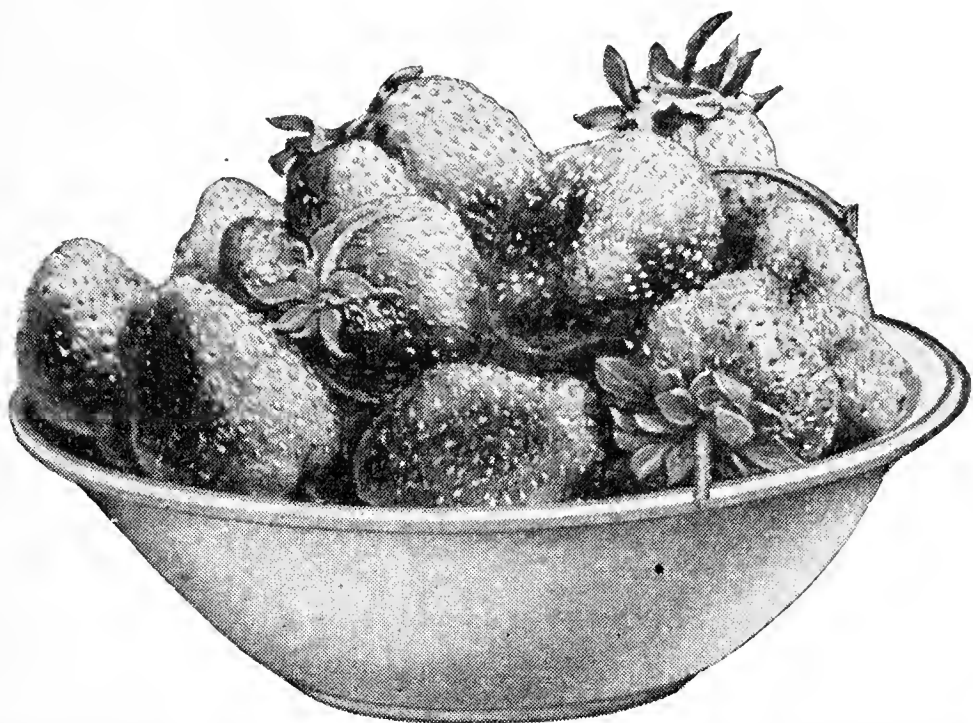

Clermont is a brand new variety. Originated at the New York Experiment Station. With us last spring Clermont was one of our finest Strawberries. Our season was very dry, but to my surprise Clermont came out on top. Berries EXTRA Early. Have fruited it three years. First berries ripe May 30th. The fruiting and size is 100 per cent with us. One picking ahead of Premier and two picking's ahead of Dorsett and Fairfax. Clermont fruited very heavy with a long season. Berries Super-Large and quality of the very best. We are more than satisfied with Clermont as a commercial variety. You will make no mistake by planting Clermont this spring.

## BITTER ROOT EVERBEARING

You must grow this amazing new variety and see for yourself why it is superior. Stands supreme for canning, jellies, jams, and pies. A favorite with us when it comes to making a delicious shortcake. Requiring less sugar. Easy to hull. Free from core. This Wonderberry produces big, solid, round, deep dark red berries. Sweet as honey. Try the Bitter Root Everbearing on your soil. It may even do better for you. We sure like it. A dish of these berries are fit for a king. Plant Bitter Root this spring and enjoy Strawberries until Jack Frost comes. Postage see page 22.

**25 for 50c; 50, 95c; 100, \$1.75**

## NEW MASTERPIECE EVERBEARING

This variety must have some merit as it has been introduced enthusiastically by a responsible Iowa nurseryman. We have found it superior in many ways to other Everbearing varieties this past summer and fall for its size, flavor and keeping qualities. One of the largest, sweetest and most productive Everbearing ever produced. For its behavior with us it is very promising. This fine new variety won first prize at our fair.

**25 for 50c; 50, 95c; 100, \$1.75**

## EASY PICKER

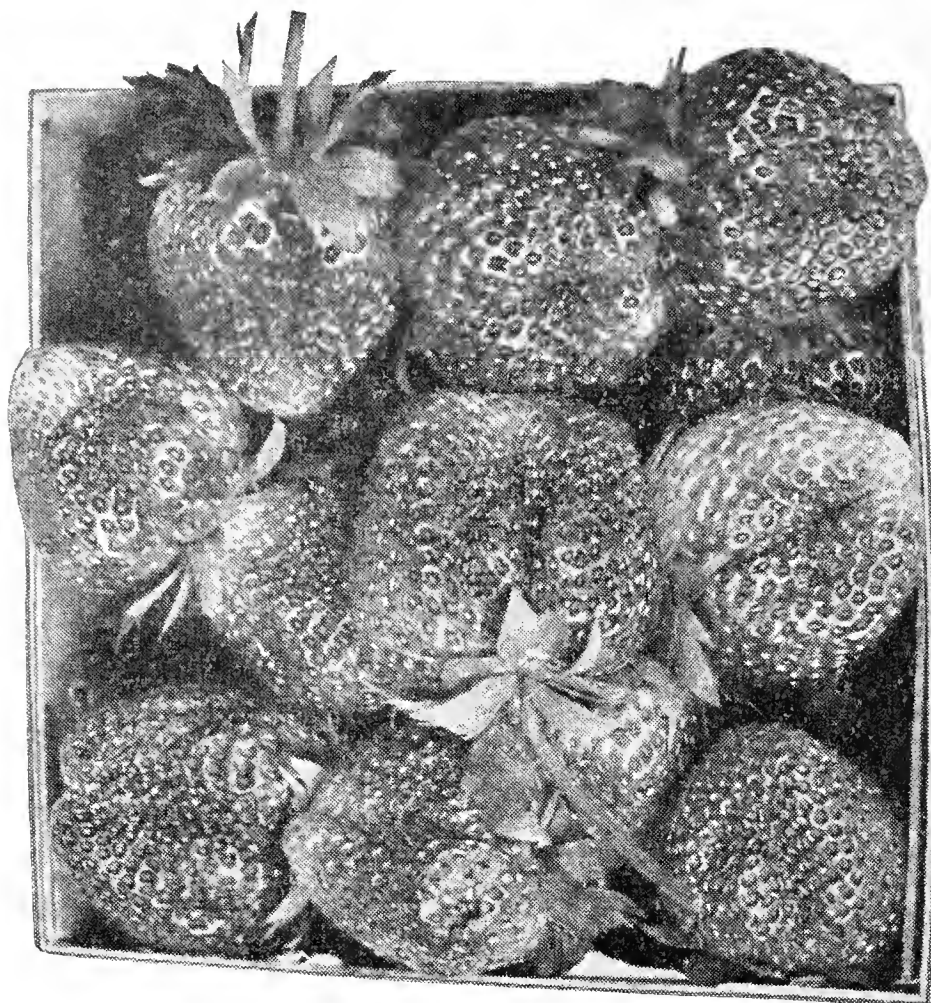

Easypicker is a distinctive new variety that comes to us from a customer in Minnesota. The fruit is dark red in color, rich and deliciously flavored. Berries are large in size and firm. An ideal shipper. Makes a good fruiting row. The Strawberries are medium early and are very easy to pick. This new berry has done very good with us here in Michigan. We offer only the "BEST BY TEST." We try out all kinds. We have to do it to find out which ones prove valuable as assurance of your success. A good variety is an advertisement for us. In view of this we offer Easypicker plants very reasonable for a variety so valuable. A Grand Strawberry that is certain to give satisfaction. Five per cent free plants see page 22.

**25 for 25c; 50, 40c; 100, 75c; 300, \$1.25; 500, \$1.95; 1,000, \$3.90**

The 1,000 berry plants were far better than expected. Clyde W. Banks, Mauston, Wis.

## OAK HILL'S SPECIAL

This wonderful new berry is handsome in appearance, very large, round and smooth. Beautiful rich, red color. Grown on long fruit stems, 8 to 10 inches long. Thick as a common slate pencil. Plants grow from 12 to 15 inches high. After testing this variety with others it is found to be the best. Particularly valuable for the longest season Strawberry known.

It bears large quantities of the choicest Strawberries for six weeks. Large as a small peach, with nature at her best. From 350 plants we picked 150 quarts of Strawberries from one picking. Our berries were extra large throughout the berry season. We got 25c per quart; never had enough. Think of it, \$37.50 from one picking; 350 plants.

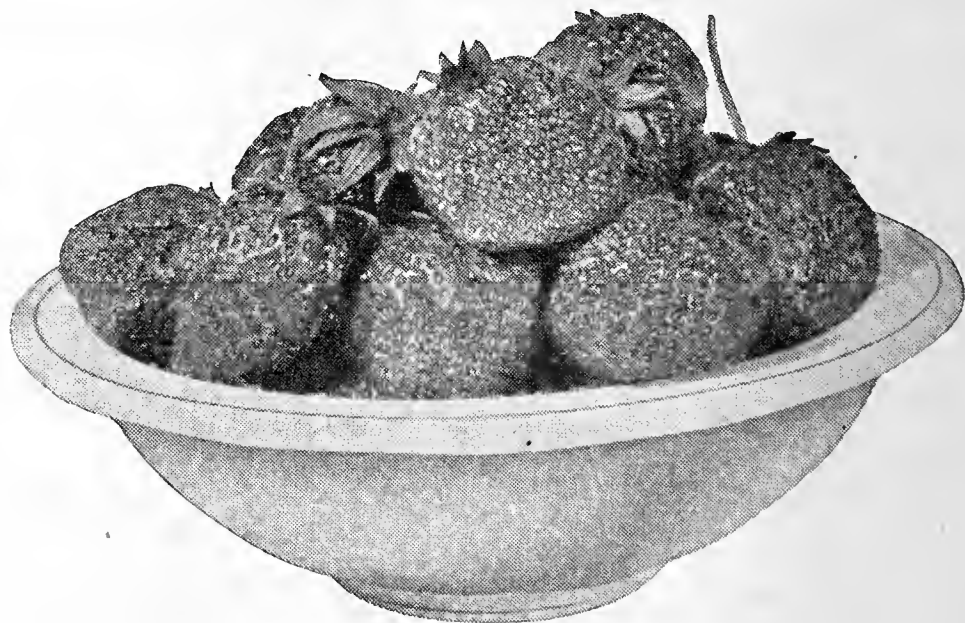

Every year our berry customers come in and say, we want some more of those Oak Hill's Special Strawberries. This is our favorite Strawberry. Extra sweet with two big bites to each berry. They sure are Giants, both plant and berries. Hand cleaned plants. Plants tied with purple string. Postage see page 22. Our sandy loam plants will save you postage.

**25 for 30c; 50, 50c; 100, 90c; 300, \$1.95; 500, \$2.95; 1,000, \$5.90**

## DORSETT

Dorsett was introduced by the U. S. Department of Agriculture. A cross of Royal Sovereign and Howard 17 (Premier). Its vigor, productiveness and dessert quality were outstanding. Ripens with Premier, but a much larger early crop is produced.

Runs about 30 16-quart cases to the acre more than Premier. For size, quality and firmness Dorsett will run 100 per cent. Has a record of over 11,000 quarts per acre. Fruit very large, conic in shape and a color of bright red. Its flavor is mildly subacid, aromatic, juicy, sweet and very pleasing. Dorsett, Fairfax, Clermont, Oak Hill Special and Premier about the same picking records. Of over 11,000 quarts per acre. We would advise you to try out the above varieties with Premier in your locality and your soil. You will not be disappointed at fruiting time with any of these varieties. From all reports Dorsett will be a prize winner and a money maker for berry growers. We urge you to test out Dorsett for commercial plantings. We have an extra large supply of fine certified plants. There will be a large demand this spring for Dorsett. SO ORDER EARLY. Tied with orange string. Free plants, see page 22.

**25 for 30c; 50, 50c; 100, 90c; 300, \$1.95; 500, \$2.95; 1,000, \$5.90**

Out of 15 Catalogues yours was no exaggeration, prices in plain figures. Reasonable. Mr. P. F. Swier, Monence, Ill.

# PREMIER

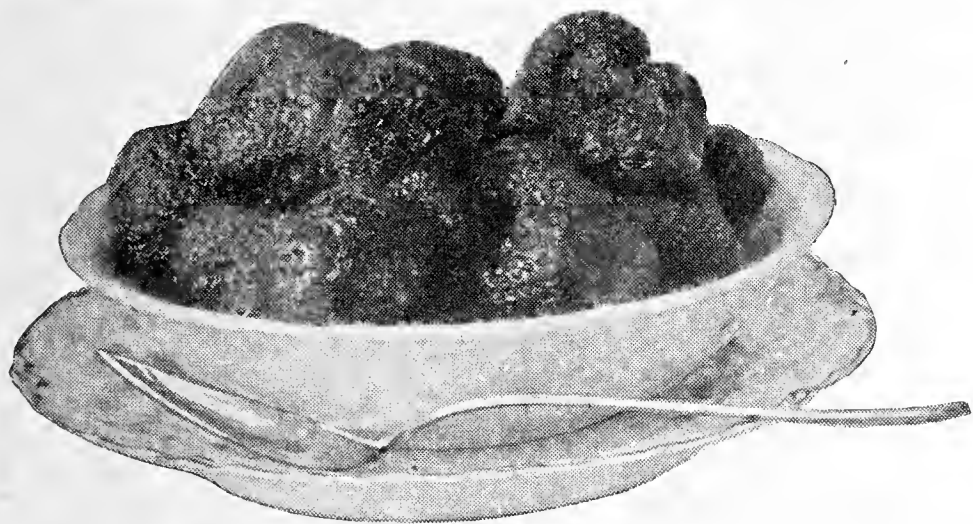

PREMIER were first put on the market in 1915 and plants of this fine variety spread over the country like wild-fire. It is a berry without a fault and with perfect satisfaction wherever grown.

One week earlier than any other variety in most localities. With us last year the Clermont Variety was the first Strawberry ripe. The Premier berry in Medium dark, large size, above the average and very firm. Solid color, bright and glossy. They are beauties in a quart box. This famous variety is practically frost proof. Has a record of 728 16 Qt. cases per acre. Under natural conditions over \$1,000.00 can be made from an acre of Premier. This cannot be done from any other farm crop.

Premier may be grown in any part of the country. A profit-making commercial Strawberry and a world-wide favorite of proven success. Actually more Premier plants have been sold the last few years than any other variety. Growers know the value of Premier and the consumers demand it. It is a mortgage lifter for any grower. Plant our original heavy fruiting strain, 100% true. This means a lot at fruiting time. Our PREMIER are all certified plants by the State of Michigan. Plant this variety on the best ground that you have. Your profits will be 100% greater than the cost of the plants. Make your plans now. You can not go wrong by planting Premier, that was made famous by success. Plants tied with Yellow String.

**25 for 30c; 50, 50c; 100, 90c; 300, \$1.95; 500, \$2.95; 1,000, \$5.90**

# FAIRFAX

Fairfax was also introduced by the U. S. Department of Agriculture. Parentage probably from Premier. Fruit stalks are strong and upstanding. Fruit matures in clusters. Size very large. The Fairfax has the richest flavor and is very sweet. Flesh dark red, juicy. Dessert quality very high. Good shipper. Medium early. Fairfax will not make as many runner plants as Dorsett.

But makes a good fruiting row. With us last year Clermont and Fairfax had a few more cases of berries per acre than Dorsett. With us it fruited 100 per cent. We are more than pleased. We find Fairfax very disease resistant. So you can take your pick from whatever variety you may choose, you can not select a poor Strawberry from this catalog. In our 18 years of Strawberry growing and with over 25,000 customers we soon hear if a variety is poor in general the country over. Still sometimes one variety will do better on some soil than another. This is also true to climate. We try to grow the best and discard the rest. We have discarded the Washington, and Redgold, as our tests show other varieties are better. By all means plant FAIRFAX this spring. They appeal to any buyer in the market for Fancy Strawberries. Protect yourself. Order EARLY. Tied with gray string. Five per cent free plants, see page 22.

**25 for 30c; 50, 50c; 100, 90c; 300, \$1.95; 500, \$2.95; 1,000, \$5.90**

Picked 800 quarts of Mastodon from 1,000 plants. Most wonderful berry. Mr. Albert Waylander, Litchfield, Minn.

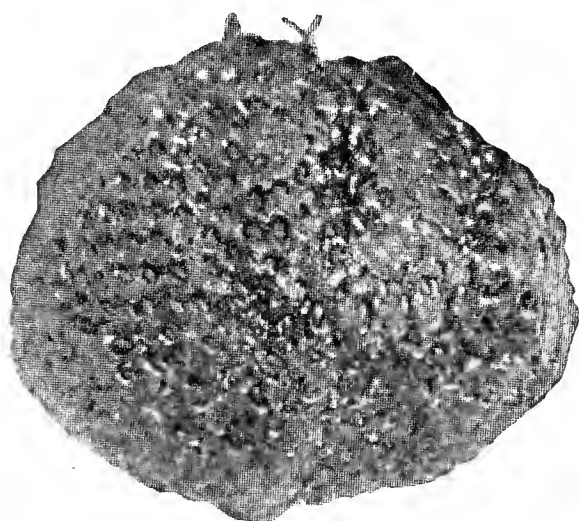

## THOMPSON'S LATE

For a long time we have wanted a good Extra Late Junebearing variety. Now I think we have it according to the report of the Originator in Vermont.

This new Variety has fruited in the New England States for three seasons. The University of Vermont reports it as an excellent berry in appearance and quality. Ripe June 23rd. We urge you to test out this late variety with Wyona Late and see which is the best on your soil and climate. If you want an Extra Late try out a few. Plants limited.

**12 for 35c; 25, 50c; 50, 95c;

## STANLEY

We Guarantee this distinct variety to differ from all others that you have ever grown. Ripens medium early. Has a wonderful flavor, long neck, easy to hull. Berries large, sugar sweet. Has the finest quality for a market or canning berry. Plants very strong, large, persistent growers. At fruiting time the plants are a snappy mass of dark Strawberries, flaming red and perfectly formed like a top.

Every Farmer should have a Strawberry bed and grow enough for the family to have fresh berries. World's Finest Fruit. Free plants and Seeds. See page 22.

**25 for 30c; 50, 50c; 100, 90c;

**300 for 95c; 500, \$1.45; 1,000, \$2.90**

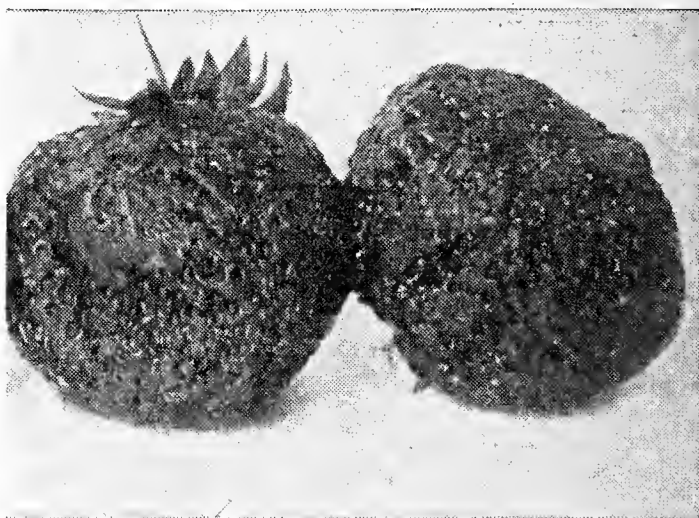

## RED HEART

Red Heart is another development of the United States Department of Agriculture. A vigorous, healthy grower, moderately productive. Berries large, high quality, rich red clear through. Recommended by the department as a canning strawberry of high quality. Fine medium early berry for the richer soils of the Northwest and the central Northern States. We are more than pleased with the fruit of this new variety.

Red Heart will make you Extra Money. Enjoy Strawberries. Grow your own.

**25 for 30c; 50, 50c; 100, 90c;  
300, \$1.95**

## WYONA

Wyona is also a new late variety, a seedling from the Gandy. It will insure you against a crop failure. It is such a late bloomer, and has never been known to be killed by frosts. A very fine variety for the far North. About a week later than Gandy or Pearl. Almost as productive as Premier. Berries are large, bright Red, firm and good shippers. Foliage is healthy dark green and makes plenty of plants for a good fruiting bed. Quality of fruit is excellent.

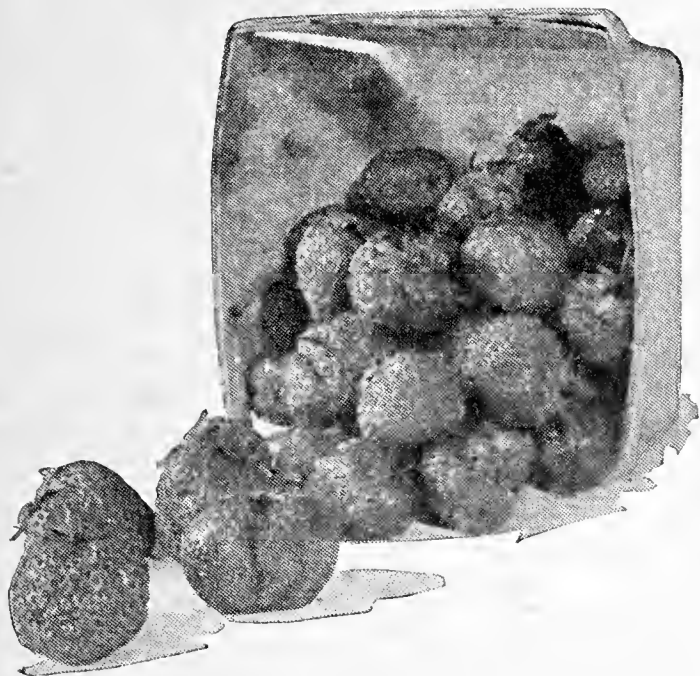

**50 for 50c; 100, 90c; 300, \$1.95;  
1,000, \$5.90**

## BLACK STRAWBERRY

Again we offer our customers something supremely good. A June bearing of unusual merit. A Black Strawberry. Introduced by L. J. Farmer. He claims it is the darkest and best canning berry in his 51 years of Berry experience. Try some in your garden.

**12 for 35c; 25 for 50c**

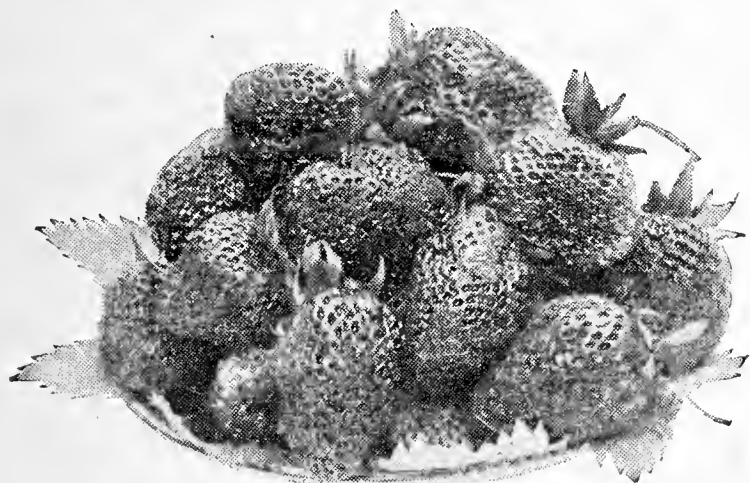

## CATSKILL

Catskill is a New York Station seedling 4435. Commercial berry growers watch Catskill very closely at the Washington Plant breeding farms in Washington, particularly its size, vigor, and quality. The test showed it out-yields everything, even Dorsett and Fairfax. Ripens mid-season. Fruit large and holds size well until end of season. From all station reports this New Berry will be a Winner.

As a mid-season Strawberry Catskill looks very good to us. We believe that we have better varieties now than at any time in the history of the Strawberry world. So we must all give our experiment stations this credit. Plants limited.

**12 for 35c; 25, 50c; 50, 95c;  
100, \$1.75**

## BLAKEMORE

Reports from the South and East that Blake-more yielded more Early Strawberries to the acre than Premier and held up well in the drouth. Rows should be thinned to 20 inches wide.

Originated by the United States Department of Agriculture. BLAKEMORE has proved considerably superior as a market variety. Easy picking and capping qualities. Berries bright red color, tough skin, firm flesh, solid center, with excellent flavor. Produces runners in abundance. Plants certified. Tied with blue string.

**50 for 40c; 100, 75c; 300, \$1.25;  
1,000, \$3.90**

## WHITE STRAWBERRY

Pure snow-white strawberry. Berries and plants medium size. Fine flavor, sugar sweet. When you pick these berries they have no hulls. Quite an attraction to grow and show your friends the only pure snow-white strawberry grown. Try a few.

**12 for 35c; 25, 55c; 50, \$1.00**

## FUGEIMA

Fugeima is a new variety from Japan. We are deeply impressed by it's fine strong growth, productiveness, quality and flavor. Fugeima outstanding characteristic is the enormous size of the fruit. Four strawberries laid side by side will measure 7 inches. Eight berries are claimed to have filled a quart box. One of our customers did find 15 berries that filled a quart box. This berry is well named. Owing to its large size it is named after the largest Mountain in Japan. Try a few and surprise your friends with a Super-Giant strawberry.

**12 for 35c; 25, 50c; 50, 95c;  
100, \$1.75**

## Early SENATOR DUNLAP

The DUNLAP is the most popular Strawberry in the United States. Known everywhere. Fruit firm, of excellent quality. Good size and an unusually heavy bearer. Has a wide range of soil and climate. Yields big profits for growers. An old time favorite. Plant DUNLAP for preserves and for general uses. Our biggest plant seller. Plants tied with brown string.

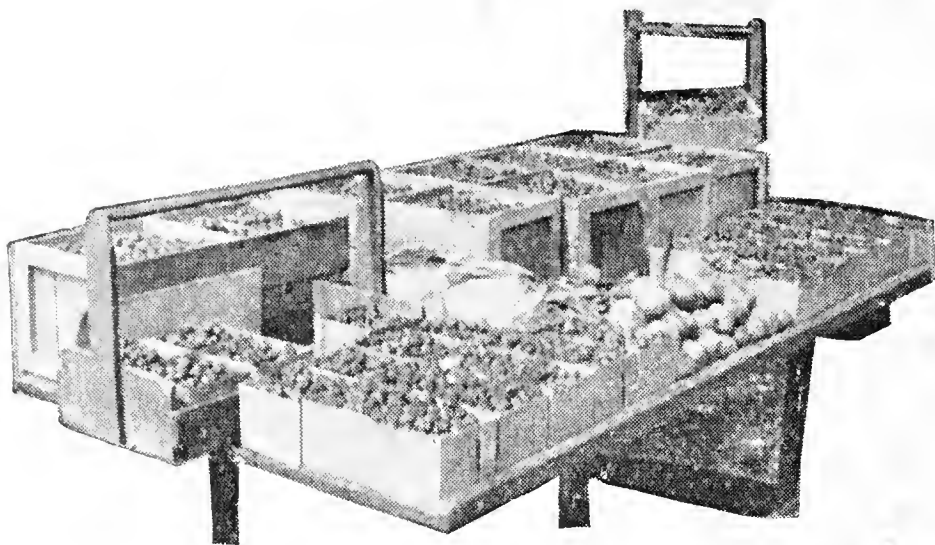

Dunlap is the easiest Strawberry grown. What is better than a good fresh shortcake or a can of fruit from the cellar in the winter when snow is piled mile high.

**50 for 40c; 100, 75c; 300, \$1.25;  
1,000, \$3.90**

## PINK STRAWBERRY

Pink Strawberry is the largest strawberry grown. A great novelty. Pink true color. Strangely different. Runners thick and heavy. Berries sweet as honey. No acid. Real Fancy. Super in size. Try out this unusual berry.

## Virginiana Juniper (1)

Medium compact growth foliage varies, in summer green and tint blue fall purple hue, in winter a bronzy hue is assumed. Hardy and quick growth in any soil. A beautiful Evergreen. Heavy field grown. 10-12 in., two times transplanted.

## Savin Juniper (2)

Low spreading Evergreen of many dense branches and short straight, tufted branchlets of beautiful deep green foliage. Blackish-purple berries. Constantly attracts attention wherever planted. Heavy field grown. 9-12 in., 2 times transplanted.

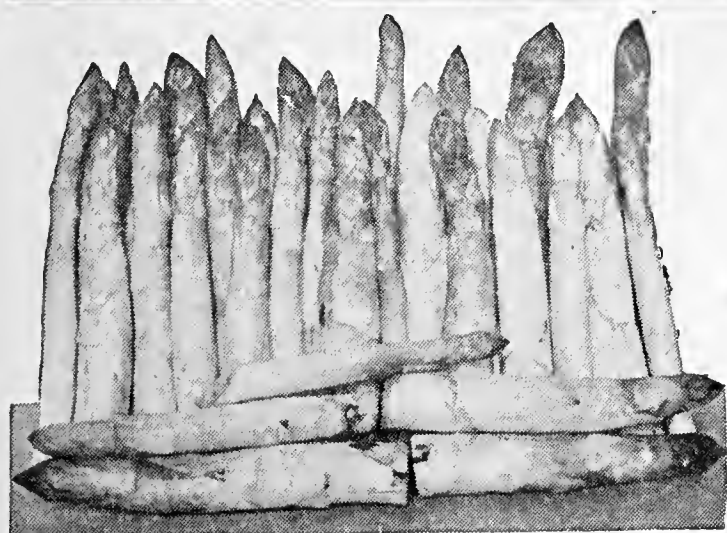

## Mugho Pine (3)

The best dwarf ball shaped Evergreen. It grows compact. Heavy dark green needles on many stems branching close to the ground. Very attractive, especially in the Spring when growth appears as numerous tiny silver candles covering the entire bush. Very conspicuous and showy. Heavy field grown. 6-9 in. Transplanted once.

## Irish Juniper (4)

Real handsome Evergreen always neat and clean. Grows erect, slender and stately in habit. Having rich bluish-green foliage. Grows sturdy in poor soil. Rapid growth, a highly prized Evergreen. Heavy field grown. 10-12 inches, once transplanted.

35c Each; 3 for 95c; 6 for \$1.75

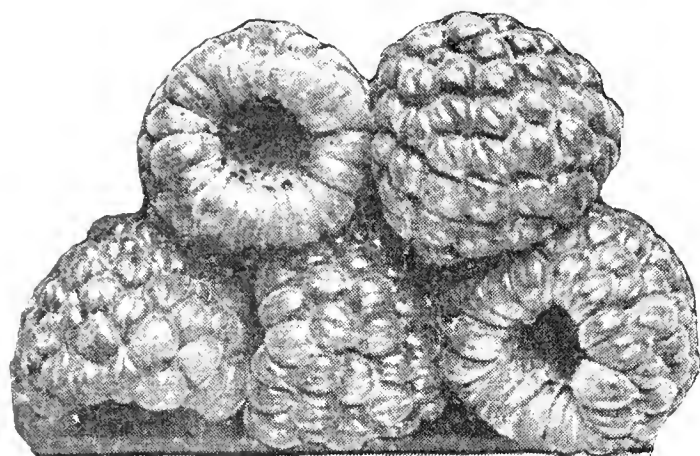

## Asparagus Roots

**MARY WASHINGTON**—A new pedigreed strain, rapidly replacing all other varieties. U. S. Department of Agriculture introduced this famous new rust-proof variety after many years of scientific breeding. This remarkable strain has long mammoth tender shoots, unopened, and do not start to leaf out even when they are 2 feet high. Why not have the best, earliest and most delicious vegetable from your garden. When snow goes, asparagus comes. One planting will last 20 years. Start now. Heavy one-year-old roots.

**OUR ROADSIDE FRUIT MARKET**

## Dear Customers and Friends Everywhere

As our new **Eighteenth Annual Catalog** again greets you, I wish that I could put on my old straw hat and take a walk with you all and see the wonderful Nursery Stock that we have for you this year. The best that we had in years due to irrigation and our late fall rains. We would visit our five Rockgardens, three Lily Ponds of over 1,000 square feet of water with nine islands. We would see all kinds of Flowers, Evergreens, Rockgarden plants, hardy perennials, Testing Beds of Everbearing Strawberries of many varieties. Our Vegetable gardens. Our Giant Dahlias you could not miss, as they are a simply gorgeous combination of tints and colors. A visit like this would be like Fairyland at blooming time. This is my life's work with interest and my whole family enjoys it. Why not turn your garden this year into a Fairyland and make your dream garden come true by planting our Seeds, Bulbs, and Plants. Many a color is hidden away in our Bulbs and in a Jumbo Packet of our Seeds.

### How to Plant Strawberries

**Practically any soil** that will grow a good field or garden crop will grow fine Strawberries. Use the same care as you would in setting vegetable plants. For home gardens set 12x18 inches. It will require about 8,000 plants to set one acre. Eighteen inches in row with rows 36 inches apart. Barnyard manure is the best fertilizer. Ground should not be too rich. Make hole with a spade and set roots straight down and spread roots slightly. Set plants firm. Press ground solid with foot. Do not water plants, just dip roots in water before setting. Do not cover the crown or heart of the plants. Plant just as early as your ground can be worked. Earlier the better, in March, April or May. Keep off buds for 60 days after setting a new bed.

**All varieties listed** in this catalog are of perfect blossoms and can be planted alone. Young runner plants may be cut off or laid along the row as desired. Be sure to pick off blossoms from new set beds until July first, about three times. The plants will have a better opportunity to become established and develop better root system before beginning to fruit. Not necessary to bud the second year for early spring bearing. For best success set out a new bed each year from your young runner plants.

**All our plants** are dug each day as needed and packed at night when plants are cool. By this method you get them in the best of growing condition. We want every prospective customer to know that when you send your order to Oak Hill Nursery you are getting your stock direct from the grower. All our plants are certified. There are no better plants grown than ours this year. **SO WHY PAY MORE?** You will find that our plants are trimmed and cleaned, ready to set out. We get a lot of compliments from our customers on cleaning and packing. Saving them transportation charges. Bigger values with less money all the way around.

I personally thank you in advance for any order that you give us this year. Whether it is large or small it shall have my personal and prompt attention.

Yours very truly,

EDW. L. LUBKE.
